Training and experience

August 2020 – September 2020: Techxers Kenya Limited – Internship

Undertook a one-month internship at Techxers Kenya Limited. The program was aimed at helping get a feel of the real-world job market. During the period I was involved in:

- Web systems development. I had a more practical engagement in development of Web systems development. I was more exposed in the use of PHP web technologies and Laravel PHP framework.
- Technical documents writing. I had the engagement in the writing of technical documents such as terms and privacy policy during the period of practice.

February 2019 – May 2019: Kenya Forestry Research Institute (KEFRI) – Industrial Attachment.

Undertook my industrial attachment training at Kenya Forestry Research Institute (KEFRI) Technical department, ICT section. During the period I achieved the following:

- Built my skills more on Web based system development, had practical experience on Software systems administration and management, configuration and troubleshooting of networks and hardware integrations, Diagnostics and Maintenance.
- Developed a web based tree information web system. Lead of a five-member group that developed a web-based system named PANDAMTI. We used web technologies HTML, CSS3, JAVASCRIPT and BOOTSTRAP Library for the frontend interface development and php 7 for the backend development.

January 2018 – April 2018: Dedan Kimathi University of Technology -Industrial Attachment (within the institution)

Took part in industrial attachment within the university which was part of the curriculum. With the period I achieved the following:

- Software development skills: focused on web system development. At the end of the period, developed a web based hotel booking system
- Hardware integration and maintenance skills
- Network configuration and troubleshooting

Skills

Web Application Development Skills

Frontend interface development for Web Application Systems and websites

I can competently work on frontend interface development of web application systems and websites using the web development technologies, namely: HTML5, CSS3, BOOTSTRAP Libraries AND JavaScript (Vanilla).

Backend development

I have rich knowledge in backend integration of Web Application Systems using PHP and MYSQL. I can also competently integrate real-time database, Firebase, for web systems.

Content Management Systems

I have excellent skills in the integration and maintenance of CMS systems. Hands on experience with WordPress CMS for the development of Web systems. I can comfortably work with different templates and plugins.

Microsoft Office Suite Skills

I have experience in the use and work with the Microsoft Office Suite. I have excellent grasp in the concept of most of the software in the packages that make up the suite.

ICT Systems Support Skills

I have perfected the computer interaction skills over time with adequate exposure from my interaction with computers in different training forums. I can competently integrate and configure computer devices, troubleshoot and perform diagnostics and also offer maintenance support services for computer systems.

Accounting Software Skills

I have the ability and competence to use the accounting software for accounting purposes, with deep understanding and competence with the QuickBooks Accounting Software Package.

Hobbies

Exploration of literature in reading and writing

Adventure and learning new things
